What is SelectaDNA?

SelectaDNA is a forensic marking system designed to reduce theft and burglaries by coding valuable possessions with unique synthetic DNA, and using warning labels to alert criminals that your property is protected.

**DNA
PROTECTION**

**SECURE
DATABASE**

**MICRODOTS
INSTANT ID**

SelectaDNA is the world's most powerful crime prevention solution. Each system contains a unique forensic code which can link thieves to a crime scene. The system is a huge deterrent, as the one thing criminals fear most is... DNA evidence.

Mark up to 50 valuables in your home with a unique DNA formula that is inconspicuous and virtually impossible to remove.

Apply the formula to goods such as TVs, Smartphones, Desktop PCs, Laptops, Digital Cameras etc, attach the tamper-resistant warning stickers and prominently display the window stickers to let thieves know what they're up against!

Finally, register your marked possessions on our Police and Insurance Approved Secure Asset Register so that if the worst happens and your property is stolen, police from around the world can reunite you with it quickly and easily.

How it works

Step 1

Use SelectaDNA to mark and protect your property

Step 2

Use signs & stickers to show your possessions are protected

Step 3

Register your unique DNA code on our secure database www.secureassetregister.co.uk

*Based on a 1,000 home crime reduction initiative in North Manchester, 2010-2011
